SunMarqee

The premium sun awning for yachts and architecture

SunMarqee combines sophisticated engineering, timeless design and premium materials to create exceptional shading solutions for demanding environments.

Designed for both the marine industry and high-end architectural applications, the patented system features continuous support elements that provide outstanding stability and a clean, elegant appearance.

Manufactured from AISI 316L stainless steel, SunMarqee is available with an electropolished or manually high-gloss polished finish.

With its compact installation requirements, wide range of textile options and optional integrated water spray system, SunMarqee offers versatile shading solutions – from luxury yachts to exclusive rooftop terraces and architectural outdoor spaces.
