windScreen & privacyScreen

Removable textile wind and privacy screens – lightweight, custom-made and easy to install.

Keep your privacy. We provide a range of solutions for wind protection and privacy screens. From vertical textile privacy screens which can be tensioned between carbon poles, to semi-automatic transparent windscreens which are integrated in the exterior ceiling and rolled down with the use of a power tool.

Combined with removable stanchions, this system is ideally suited to fully enclose an exterior deck space which can then be heated or air-conditioned.
