HPS-200-PP/24 V

pump	2 stage
B	184 mm
H	271 mm
L	199 mm
flow 1st stage	2000 cc/Hub
flow 2nd stage	500 cc/Hub
weight	5,60 kg
voltage	24 V

Compact electric hydraulic powerpacks for high-pressure supply at the push of a button.

The HPS-PP powerpacks are designed to operate Reckmann rigging hydraulics where compact dimensions, high pressure and dependable performance are required. Their **two-stage pump** design combines fast oil flow for quick movement with controlled pressure build-up for powerful hydraulic operation.

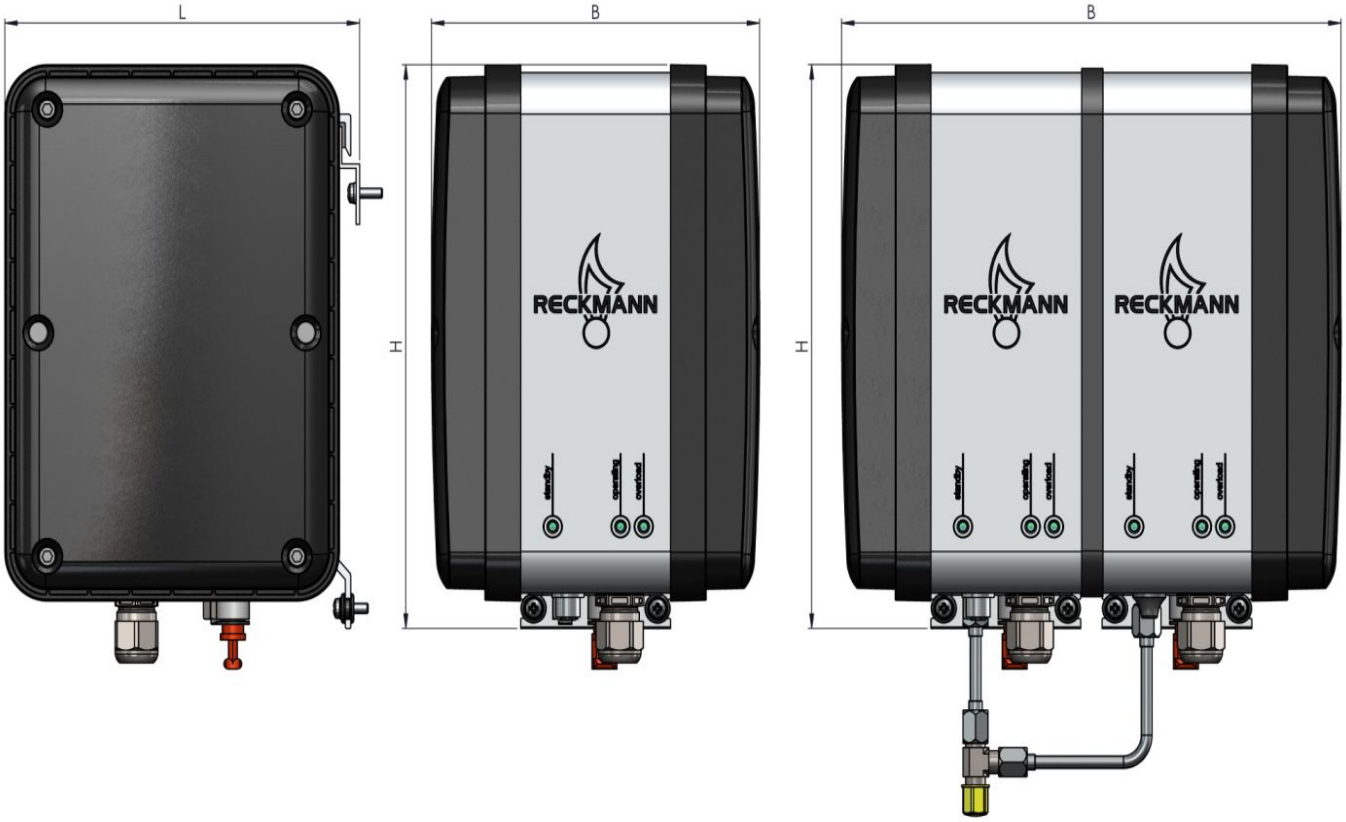

Available in different sizes and as **12 V or 24 V** versions, the HPS-PP range can be selected according to the required flow rate, available installation space and onboard power system.
