# TTS-5/B

| | |
|---|---|
| connection options | B - via endless loop |
| purchase | 1:1 |
| material | Titanium |
| application | for removable stays (Code Zero and staysails) |
| max. work load SAILING | 60 t |
| safe work load (UN)FURLING | 29 t |
| break load (bl) | 130 t |
| weight | 19 kg |
| A | 264 mm |
| d | 45 mm |
| E (max. rope size) | 36 mm |
| G | 51,50 mm |
| W | 45 mm |

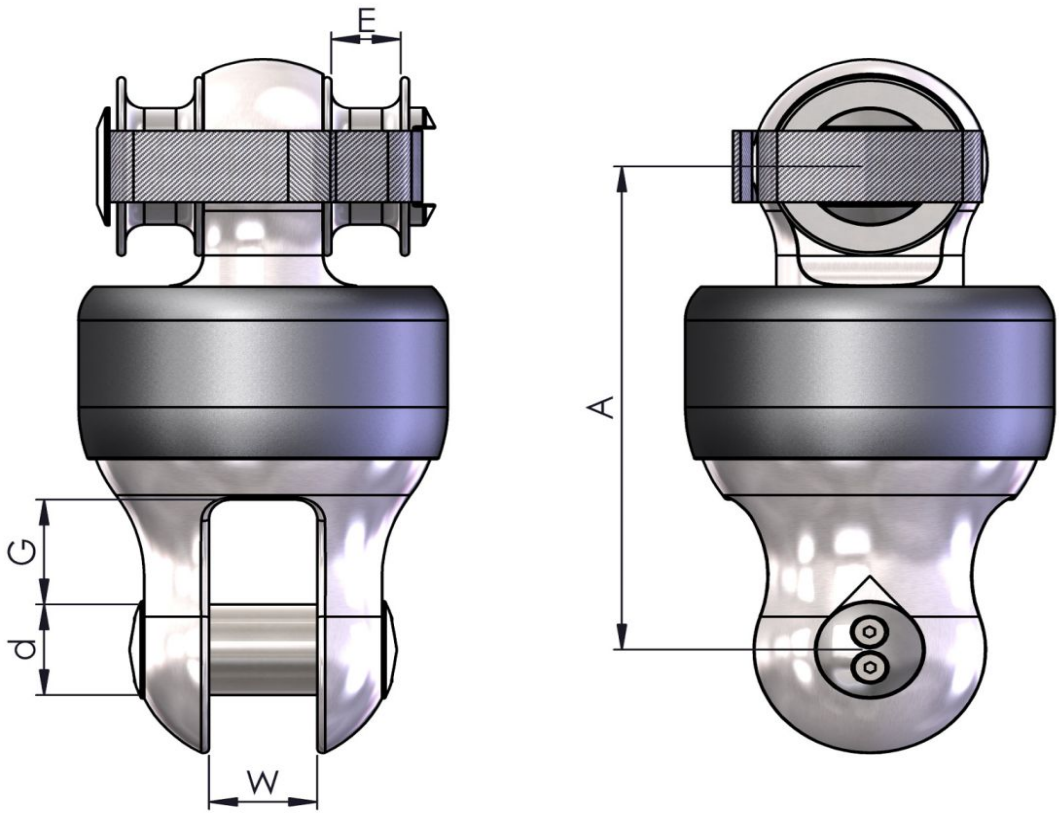

## swivel to connect via endless loop

The highly-compact swivel for foresail furling systems with torsionally rigid forestays are distinguished by their extremely low weight. For workloads of 12 tons or more, we make the swivels out of titanium. The smooth-running bearings ensure that the swivels can turn with minimal lag, meaning that the stay is protected from strong torsional stresses.

There are several names for this connection: loop, bone, basket, monkey ears and many other definitions can be used to describe the simple connection of the halyard using the endless loop. The practical solution of securing the connection with velcro allows it to be opened swiftly at the same time.
