weight	2,60 kg

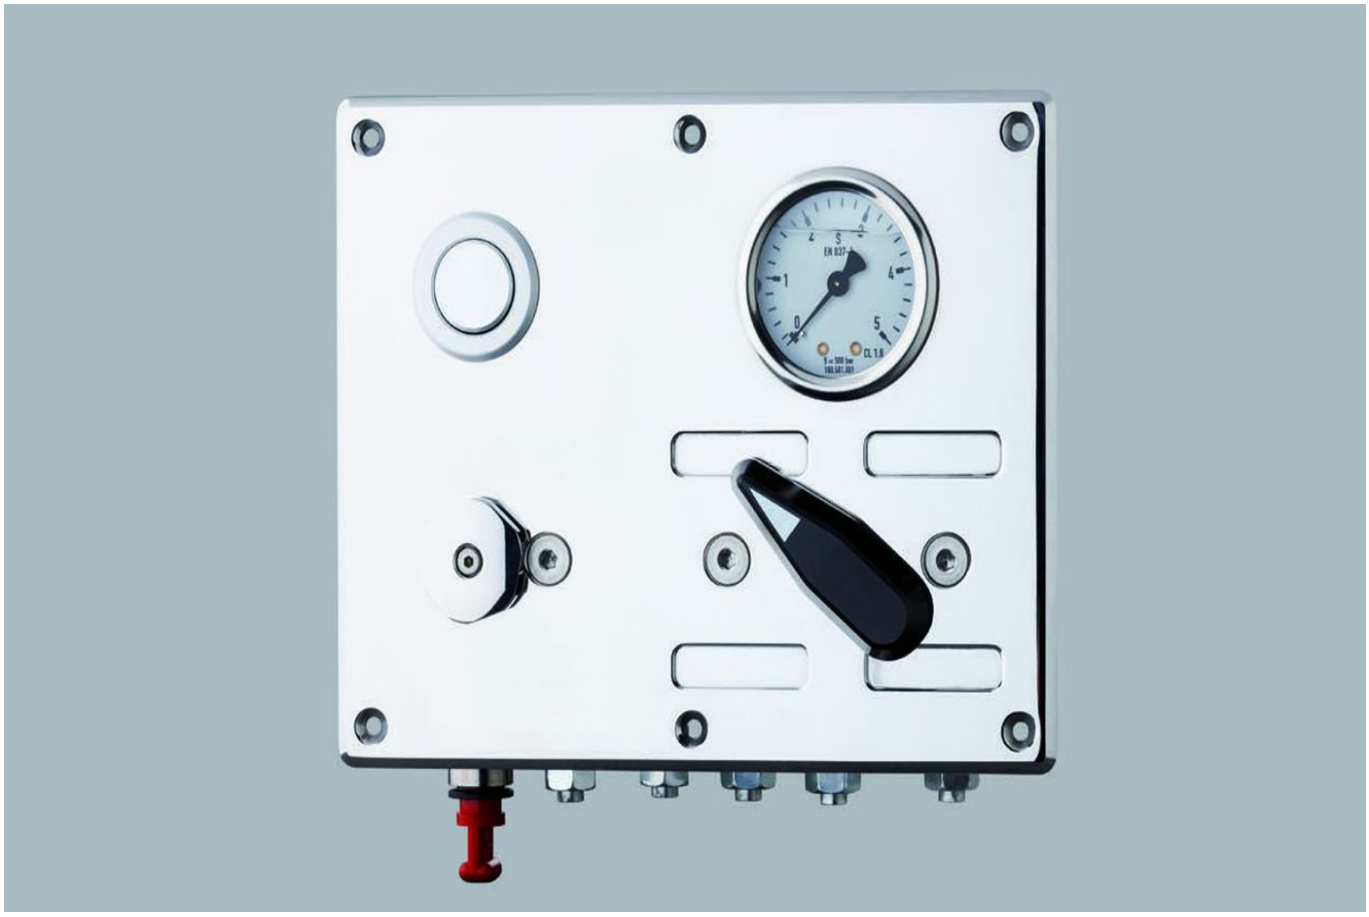

Hydraulic Control Panel for electric pumps

Reckmann offers systems for operating rigg hydraulic cylinders that are customised for the project requirements. The pumps that were developed especially for this use are extremely compact and powerful at the same time.

We would be happy to submit a concept customised for your requirements profile.

Control unit HPS-200:

- Face plate Aluminum clear - article code: 26513
- Face plate Aluminum clear - article code: 26518
- Face plate stainless steal - article code: 26519
- Face plate - article code: on request
