FURLING SYSTEMS WITH PROFILES: LEADING THE WAY

Knowing where you want to go isn't just the most important prerequisite for success in sailing. We've known the direction we're going in for decades: To develop high quality products which make sailing simpler, safer and generally more fun for you. An example of this are our manual furling systems. The MF series is the latest generation of furling systems, offering you everything you'd expect from top-level equipment: Unlimited reliability with an incredibly long service life as well as low maintenance operation. All rolled up into a compact, classic design. Not only that, but the new below-deck version of the MF system offers increased flexibility since it can easily be integrated around systems made by other manufacturers.

IN DETAIL: ADVANTAGES AND IMPROVEMENTS TO THE MF SERIES

- 01 Flexible: integrated length adjustment**
With the MF series, you can adjust the stay length as you see fit – without the system having to change position. The tensioner is located in the transition area from the drum for profiles.
- 02 Elegant: Stainless steel drum guard**
The drum protection cage prevents the reef line from slipping and protects it from damage.
- 03 Safe: FS Halyard Swivel**
Reckmann's tried and tested halyard swivels produce hardly any friction when turning. This makes it safe to operate without the halyard twisting. Its compact design, combined with its size gradation, ensures a low top weight.
- 04 Smart: the below-deck version**
As well as the MF system, there is also a practical below-deck version. It can then be comfortably installed around systems produced by other manufacturers.

	MF-1/R10	MF-1/R20	MF-2/R20	MF-2/R30	MF-3/R40	MF-3/R50
ABOVE DECK						
BELOW DECK	MF-1DF/R10	MF-1DF/R20	MF-2DF/R20	MF-2DF/R30	MF-3DF/R40	MF-3DF/R50
Boat size [ft]	30 – 37	35 – 44	40 – 46	42 – 56	54 – 65	63 – 85
max. Forestay-length [m]	15,6	20,1	20,1	24,75	27,9	36,9
